

Bin markers — chevrons

Settings → Bin Openness → Marker strips → *Chevrons*. Each dash bent into a V, which no straight edge in the room can counterfeit — a counter lip or a wood seam seen in perspective ramps steadily, and none of them can reverse that ramp at a midline. Opens on 4 dashes where a plain row of the same height needs 6, for about twice the time a frame. Print at 100%, no fit-to-page, matte stock, and cut on the dashed line.
